Dear Colleague!

We would like to invite you to take part in our residential course “**Creativity and Thinking Skills in Language Education**” (for [school teachers](#) and for [adult education](#) providers) which is organised for various groups of education professionals interested in the development of learners’ creativity and thinking skills when teaching a foreign language.

The course is included in the Comenius/Grundtvig catalogue of the European Commission and is **eligible for funding that covers all costs** associated with it.

### WHEN

**27 october – 02 November 2013**

**Deadline** for grant applications in your [National Agency](#) is 30 April 2013

### WHY

Familiarise language teachers with a possible approach to the development of thinking skills of learners when learning a language (including both a foreign language and a mother tongue).

Provide the participants with practical tasks and technologies for introducing thinking skills training in the process of teaching and learning a language. These will include the materials developed by the trainees during the course.

### WHERE

Riga, Latvia

### WHO

The course is not connected with one particular discipline, therefore teachers of various subjects (science, social disciplines, humanities, arts) and age groups (from pre-primary to adult education) are welcome to apply. During the course, participants will join in small groups according to the subject and age group taught.

You can find video excerpts from the previous courses on our [YouTube](#) channel:

Please do not hesitate to contact us for any further information.

On behalf of the trainers’ team,  
Alexander

### ABOUT US

TA Group is an educational company with the main field of interest in the development of technologies for teaching thinking skills and dispositions of various groups of learners. Among other activities we are involved in the development of materials that aim at the integrated development of thinking and subject matter skills. Taking part in various educational projects we are looking for colleagues who share our interest in teaching thinking. Taking part in one of the courses is a good context for you to get to know our approach and decide on possible cooperation.
